

**Broadening patient  
treatment options  
in the veterinary  
industry.**

## Quality Assurance: GMP & Formulation Standards

### FACILITY STANDARDS

The UK is the only country that requires specials or compounding facilities to adhere to GMP regulation.

This requirement allows Bova to deliver its formulations in a world class facility, where the benchmark of quality is backed by the stringent regulatory system it abides by.

### FORMULATION STANDARDS

- Sourcing of quality API's, testing of API's
- Stability trials
- All testing must be done from GMP labs who use fully validated methods
- Staff training and validations are done prior to any production
- Environmental monitoring, particle counting, pressure testing
- End product testing

## FACILITY

## **Formulation of**

- Novel presentations of medicines to improve compliance
  - Palatability, prolonged use injections, pastes, liquids
- Replace medicines otherwise unavailable from market  
Sterile manufacturing available

**PRODUCT LIST** : Only available on request [www.bova.co.uk](http://www.bova.co.uk)
